Abstract *The abstract of the paper (optional for short contributions) must be typeset in italic, with Times New Roman 11-point font. The left and right margins must be set to 3cm. The keywords must be typeset in regular, with Times New Roman 11-point font. The left and right margins must be set to 3cm.*

Keywords Some keywords, important, relevant.

Modèle pour les Actes de JOBIM 2012 [Titre]

Version L^AT_EX 2_ε [Sous-titre]

Résumé *Le résumé du papier (optionnel pour les contributions courtes) doit être typographié avec la police italique Times New Roman en 10 points. Les marges gauche et droite doivent être à 3 cm du bord de la feuille.*

Les mots-clés doivent être typographiés avec la police régulière Times New Roman en 10 points. Les marges gauche et droite doivent être à 3 cm du bord de la feuille.

Mots-clés Les mots-clés, importants, significatifs.

1 Introduction

This is the L^AT_EX template for JOBIM 2012 proceedings. Please do not modify or alter in any way the style sheets provided in this document. **A paper disregarding the format described in this document will be rejected (even if it was previously accepted by the program committee).**

Use *Helvetica* bold 14-point font for the title, *Helvetica* bold 12-point font for the subtitle, *Times New Roman* 11-point font for the name(s) of the author(s), *Times New Roman* 10-point font for the address(es), and *Courier New* 10-point font for the email(s). Please typeset the last name(s) of author(s) in small caps, starting with an uppercase first letter.

For the main text, use *Times New Roman* 11-point font and 6-point spacing between paragraphs. Italics may be used to emphasise words in running text. Bold type and underlining should be avoided. With these sizes, the interline distance should be set so that around 50 lines occur on a full-text page.

Note that the length of long papers must not exceed 10 pages, whereas short papers must not exceed 2 pages (see long/short class options, Section 4 on page 3).

If you write your text in french, please use:

```
\selectlanguage{français}
```

2 Document Structure (*Helvetica* 12-point type, bold)

The horizontal margins must be set to 2cm each, with no binding offset. The vertical margins must be set to 2.5cm each. You can provide the `showframe` option of the \LaTeX 2 ϵ class to see the page layout.

Title, subtitle, abstract and keywords do must be written in English (even for French written papers).

French versions of the title, the subtitle, the abstract and the keywords are required only for French written papers and may complete English versions. They must be included in a 17cm width dark blue (RGB: 0, 0, 128) frame. They must be typeset with the same font as the English version, with respective sizes 12-point, 11-point, 10-point and 10-point.

Les titre, sous-titre, résumé et mots-clés doivent être écrits impérativement en anglais (même pour les articles en francais).

Les versions francaises du titre, du sous-titre, du résumé et des mots-clés sont requises uniquement pour les contributions écrites en francais et viennent en complément des versions anglaises. Elles doivent être incluses dans un cadre bleu foncé (RVB : 0, 0, 128) de 17 cm de large. Elles doivent être dactylographiées avec la même police que pour la version anglaise, avec des tailles respectives de 12 points, 11 points, 10 points et 10 points.

2.1 Headings and Sub-headings (*Helvetica* 11-point type, bold)

Title, first, second (and, if required, third) level headings should be capitalised (*i.e.*, nouns, verbs, and all other words except articles, prepositions, and conjunctions should be set with an initial capital) and should, with the exception of the title, be aligned to the left. You have to use the numbering style given in this template (*i.e.*, 2.1, 2.2, etc.). For the first level, use *Helvetica* 12-point type, bold; for the second level and, if required, the third level, use *Helvetica* 11-point type, bold.

2.2 Page Numbering

Pages must **NOT** be numbered. Final pagination will be set by the editors of the proceedings.

2.3 Figures and Photographs

Please produce your figures such that they display well in black & white mode, and integrate them into your text file. Please note that no figure will be taken into account if not integrated in your text file.

Check that, in line drawings, lines are not interrupted and have constant width. Grids and details within the figures must be clearly readable and may not be written one on top of the other. Line drawings should have a resolution of at least 600dpi (preferably 1200dpi). The lettering in figures should have a height of 2mm (11-point type). Figures should be numbered and should have a caption which should always be positioned under the figures. The final sentence of a caption should end with a period. Please center the captions between the margins and set them in *Helvetica* 10-point font for the heading and *Times New Roman* 10-point font for the text (Fig. 1 on the next page shows an example). The distance between text and figure and the distance between figure and caption should be 12 points. Again, if you use the style sheets provided in this file, everything should be okay (a style is provided for the figures too).

To ensure that the reproduction of your illustrations is of reasonable quality, we advise you not to use any colors. The contrast should be as pronounced as possible. This particularly applies for screenshots.

2.4 Tables

Table content should be in *Times New Roman* 10-point font as well as their captions. The rules used for the figures are also applied for the tables (see Table 1 on the facing page for example). Please note that no table will be taken into account if not integrated in your text file.

3 Citations

The list of references is headed *References*¹, it should be placed at the end of your contribution. It should be in *Times New Roman* 10-point font. Please do not insert a page break before the list of references. For citations in the text, please use square brackets [1] and consecutive ordered numbers [2,3] (not [3,2]) in list of references. Please find below examples on how to format references corresponding to articles [1], books [2], book chapters and proceedings [3]. Feel free to use the `abbrv` or `abbrv-fr` BibTeX styles.

4 Loaded Packages & Macros Defined by the L^AT_EX 2_ε class

This document is generated using the `jobim2012` class (derived from the `article` class). This class requires and loads the following packages:

- `hyperref`
- `times`
- `color`
- `xspace`
- `graphicx`
- `fancyhdr`
- `fancybox`
- `indentfirst`
- `geometry`
- `babel` (with `english` and `french` options)

Moreover, five class options are provided: `short`, `long`, `draft`, `final` and `showframe`. The first two options specify whether the contribution is a long paper or a short paper (*i.e.*, whether the abstract and keywords are mandatory). The next two options are just passed to its parent class (`article`), whereas the last option is passed to the `geometry` package.

Finally, several macros and environments are redefined or introduced:

- `\title{title}` (required, preamble only) sets the title of the paper.
- `\subtitle{subtitle}` (optional, preamble only) sets the subtitle of the paper.
- `\titre{titre}` (required for french papers only, preamble only) sets the french version of the title.
- `\soustitre{sous-titre}` (required for french papers only when subtitle is set, preamble only) sets the french version of the subtitle.
- `\inst{num}` (optional, inside the `\author` macro only) sets the *num* id of the institution for the current author.
- `\author{list}` (required, preamble only) sets the list of authors (separated by `\and`) of the paper.

¹ *Références pour les articles en français.*

`\institute{list}` (required, preamble only) sets the list of institutions (separated by `\and`).
`\email{email}` typesets an e-mail.
`\abstract{abstract}` (required, preamble only) sets the abstract of the paper.
`\keywords{keywords}` (required, preamble only) sets the keywords of the paper.
`\resume{résumé}` (required for french papers only, preamble only) sets the french version of the abstract.
`\motscles{mots-clés}` (required for french papers only, preamble only) sets the french version of the keywords.
`\JobimPaperMaxPages` prints the maximum number of pages allowed for current paper (currently 10).
`\JobimLongPaperMaxPages` prints the maximum number of pages allowed for long papers (currently 10).
`\JobimShortPaperMaxPages` prints the maximum number of pages allowed for short papers (currently 2).
`\jobim` prints JOBIM.
`\JOBIM2012` prints JOBIM 2012 (actually, it should work with any four digit year).

The following list of environment is provided for correctly displaying the paper: `thebibliography`, `table`, `table*`, `figure`, `figure*`, `theorem`, `lemma`, `definition`, `conjecture`, `claim`, `example`, `exercise`, `proposition`, `property`, `question`, `problem`, `remark` and `solution`.
